THERE sagoed time ahead for American farmers. The potato crop in England is an absolute failure. The wheat crop is light, and in Egypt and India not half a crop will be grown france is greatly increasing her con supption of American cereals, while new markets for our corn and whea are being opened up in countries which until within a year or two did not import a pound. Colorado will be a priner in the increasers foreign demand for American bref and mutton. The exportation from Eastern ports of these last two products is at present enormous, and we do not believe that such low prices as we have seen in the past will ever be reached again

COLORADO has reason to be proud of the whichity of her banks and other financial insti tutions When ay Cooke failed in the autumn of 1873, and the banks in the Last were compelled to avail themselves of all their privi leges, were compelled to combine for mutual lankruptcy, our banks pursued the even tenor of their ways, and only one or two small priwate concerns collapsed to remind is that there was something wrong outside of the Territory. During the past sixty days savings banks by toe score have been breaking in every part of the Zast, in fact it appears that there are but source ones left there, while Colorado

The first thing that every Democratic con vention does is to pass a string of resolutions, among which is the inevitable one denouncing corruption and public theft in the most ve hement manner, and the second thing is gener ally to nominate a set of men whose characters are in strange contrast with the platform Probably the denunciations of theft are intended as gentle hints to their candidates not to steal more than they can get their hands on The late New York Democratic convention condemned efficial rogues and roguery in language of which a saint might approve, and then nomi nated for the most important State offices some of the greatest scoundrels in the State, Tam many corcuptionists, Erie Canal thieves, etc. Boss Kelley, the great Tammany leac er, who fills the place in that organization formerly held by Tweed, absolutely controlled the convention, and ruled it with a high hand. If the I)emocrats of New York get comp ete control of the State Tweed may have an opportunity to fil his deplet ed treasury at the expense of the taxpapers of the American metropolis In the words of the Democrats of New York, "Down with bridery

THE OFF ELECTION.

There is no disguising the fact that the Republican party has met with a very great reverse in the defeat it has sustained in Ohio. Nor will the effect of the defeat se confined to that State Nething in the future is more certain to come to pass than an equally signal defeat of the same party in Pennsylvania and New York next month Both of the latter States are close politically, and the result of the Ohio invitation to come cown, issued by one for ows: Co oraco is nothing without election will discourage the Republicans and correspondingly elate the Democrats, with the icsult that we have incicated. All close ob servers of political affairs have looked for just such a result as has been reached in Ohio. The Democrats having been out of power for a long time in that State, and seing frantically eager to get at the public cirb, were fairly united and did not allow themselves to be diverted from the object in vew by any of the four or five side-shows that were temptingly displaying their wares around them. The Re publicans, on the other hand, were weakened by various causes. There was a great diversity of views among them in relation to what is known as the President's Southern policy Many of the most radical Republicans said "we will stay away from the polls and allow our opponents to triumph rather than to virtual ly indorse the administration by voting the Rejublican ticket" This feeling acded many thousands to the simy of say at homes, and was particularly influential in what is known as the Western Reserve, where the people have not yet forgotten the teachings of Gicdings and other anti slavery lights of a score of years ago The antagonism to slavery that was bred in the bones of the people in that region of country engardered a hatred of the Southern people that will last during the present generation, and will lead them to oppose any measures looking to the reconciliation of the people of the two sections The Ohio Republicans were terday the K in Kirela great victors see thy of the prestige it has acquired under its als haplessly divided on the financial ques tion. The hard times, believed by many to have been caused in a great measure by the ONE wor d have supposed from the many means adopted to bring about a resumption of dista ches and letters that have emanated from specie payments, had made many enemies of The life of the errors have the Washington within the fast month that a destinate policy, a policy strongly supported by Sec. cert is fin at the whole wis received a persteand long continued struggle over the retiry Sheiman, himself an Onio man, both nely Gove Respirablet New Speaker hip of the H use was use to take upon the stump and in the columns of the ther wo can be from Lance and place. All this shows how reliable the by many at the door of the dominant party. The Workingmen's party in One that polled many thousands of votes, it now appears was composed almost wholly of boting Republicans. The worst feature of the result is that it places the legislative branch of the national government for some time to come in dangerous proximity to Democratic control 50 many of the essue's that have made parties during the past 20 years have practically ceased to exist that we are inclined to believe that we are upon the eve of a thorough reorganization of the people political ly In many of the Eastern States both of the old parties appear to ge rapidly disintegrating, and new organizations, based u ion issues of recent origin, are taking their places. It seems that his parents kept a store for the sale of newspapers and periodicals, and "trashy literature." Here probably he found the stimulant which led him to commit the dreadful deeds for which he now stands sen tenced to be nanged. He had found his hero in these "aime novels," and he wanted to be a

We are strongly reminded of two cases which occurred a few years ago, one in England and the other in tais country. An English nobleman had been murd red by us Valet de chambre. It came out on trial by the confession of the murderer that he had been a great novel reader, and had been especially ascinated by the hero of "ack Sheppard," one of the popular novels of the day; and his consuming am Sixty two pupils were in attendance heroic deeds. His ambition was satisfied in bition was to imitate that character in that cay who wrote answers thereto uprevenge in the execution,

The American case was still more thrilling, the main facts of which will be readily recalled. During the administration of President Tyler Eleven reac no newspapers, six reac, a mutiny occurred on board the American orig "Somers," a war vessel then at sea, under the command of Commodore & ackenzie. Midshipman Spencer, son of the Hon. John A, Spencer, Secretary of War in Tyler's cabinet, trose of Denver, and one a New York the officers to death and turn the vessel into a pirate. The plan was discovered just in time to prevent its execution. Mr. Spencer, being detected as the ringleader of the mutineers, was tried under the provisions of maritime law, found guilty, and was promptly executed by being hung at the yardarm of the "Sumers." Commodore Mackenzie's course was approved of by the President, and applauded by the whole country, although great sympathy was felt for the Secretary of War and family.

The significant fact which points the moral, without adorning this sad tale, relates to young Spencer's college life. He had enjoyed every advantage which wealth and high social posi tion could bestow. His grandfather, Ambrose Spencer, stood at the head of the judiciary of the State of New York, and his father was a cabinet minister. But novel reading had been his rain. "The Pirate's Own Book" had been his constant college companion, and after his execution it was believed that he had sought and obtained a position in the navy for the purpose of putting into practice the lessons which that book had taught him.

All these cases afford instruction by which parents shou'd profit. They should be very scrupulous as to the kind of "light literature" which finds its way into the hands of their children. We should as soon give poison to our children. Novel reading is a perfect passion with multitudes. When it has attained such ascendancy it unfits the devotee for any good, even if it do not stimulate to the open commission of crime.-Presbyter and Herald.

While such results may never follow the reading of the chi Gren of this place, yet there are evils, a though not so graring, as much to be depored.

THE PRESIDENT'S MESSAGE

To the Special Session of Congress.

The adjournment of the last Congress with out making appropriations for the support of the army for the present fiscal year has rendered others and men of the sums due them for services rendered after the 30th day of une last. The army exists by virtue of statutes which prescribe its numbers, regulate its organization and employment, fix the pay of its officers and not authorize the payment of the troops in the ab ence of specific appropriations. Therefore produces by the reading of the stories the constitution has wisely provided that no itrat fill solvy of our papers, magazines, money shall be drawn from the treasury but in consequence of an appropriation made by law, there are severa extracts from papers and it has also been declared by statute that appropriation made by Congress for that fiscal year. We have, therefore, an army in the service, authorized by law and entitled to be paid, but no funds available for that purp se. It may also be said, as an additional inventive to prompt action by Congress, that since the commencement of the fiscal year the army, though without pay, has been constantly additactively employed in arduous and dangerous service, in courage and without complaint. These circuinstances, in my judgment, constitute an extransdinary occasion, requiring Congress to be convened in advance of the time prescribed by law for your meeting in regular session. The importance of speedy action upon this subject on the part of Congress is so manifest that I venture to suggest the propriety of making the nicessary appropriation for the support of the army for the current year at its present maximum numerical strength of 25,000 men, leav ing for future consideration all questions relating to an increase or decrease of the number of enlisted men. In the event of the reduction These do not a ways stand in relation of of the army by subsequent legislation during the cau e and effect, but the one is some ince a fiscal year, the excess of the appropriation could not be expended, and in the event of itsien argerecently of carrol in B iston has attracted wide a ment, the additional sum required for payment of the extra force could be provided in due time. It would be unjust to the troops now in service, and whose pay is already largely in ar-Sovere and sonteneral to be hanged. The crars, if payment to them should be further postpored until after Congress shall have conpostponed until after Congress shall have considered all the questions early to arise. Estimores of appropriations for the support of the waat should be done with see. Many have military establishment for the fiscal year ending une 30, 1878, were transmitted to Congress by the former Secretary of the Treasury, at the opening of its session in December last. These estimates, modified by the present Secretary so

as to conform to present requirements, are now

renewed, amounting to ,32,436,764.98, and

having been transmitted to both Houses of

Congress, are submitted for your consideration.

There is also required for the navy department

350 due for advances made by the fiscal agent of the government in condon for the support of the foreign service; \$501,000 due to the naval hospital und; \$150,000 due for arrearages of pry to officers, and -4,521.958 for the support of the marine corps.

There will also be nreded an appropriation of #262,565.22 to defray the unsettlest expenses of the United States, courts for the fiscal year ending une 30th last, now due to att rneys, commissioners, and marshals, and for rent for the court rooms, the support of pricesers, and other deficiencies. Part of the building of the Interior Department was destroyed by fire on the 24th of last month, and some immediate renairs and temporary structures have in consequence become necessary, an estimate for which will be transmi ed to Congress immediately, and an appropriation of the funds is respectfully recommended. The Secretary of the Treasury will communicate to Congress, in connection with the estimates for the appropriations for the support of the army for the current fiscal year, e-timates for such other deficiencies in the different luanches of the public service as require immediate action, and can not, without inconvenience, be postponed until the regular session.

I take this opportunity to invite your attention to the propriety of acousting at your present session the necessary legislation to enable the people of the United States to participate in the advantages of the International Exhibition of Agricultural Industry and Fine Aris, which is to be held at Paris in 1878, and in which this government has been invited by the goveroment of France to take part. This invita tion was communicated to this government in May, 1876, by the Minister of France at this capital, and a copy thereof was submitted to the proper committees of Congress at its last ses sion, but no action was taken u son the subject. The Department of State has received many letters from various parts of the country, expressing a desire to participate in the Exhibi ion, and numerous applications of a similar nature have also been made at the United States Legation at Paris. The Department of State has also received official advice of the strong desire on the part of the French government that the United States should participate in this enterprise, and space has been and still is reserved in the exhibition bui dings for the use of exhibitors from the United States to the exclusion of other parties who have been applicants therefor. In order that our industries may be properly represented at the Exhibition. an appropriation will be needed for the payment of salaries and the expenses of commis sioners, for the transportation of goods, and for other purposes in connection with the objects in view, and as May next is the time fixed for he opening of the exhibition, if our citizens are to share the advantages of this international competition for the trade of other nations, the necessity for immediate action is apparent to enable the United States to co-operate. In the International Exhibition which was held at Vienna in 1873, Congress then passed a joint resolution making an appropriation of \$200,000, and authorizing the President to appoint a certain number of practical artisans and scientific men who should attend the Exhibition and report their proceedings and observations to Provision was also made for the appointment of a number of honorary commissioners. I have felt that prompt action by Congress in accepting the invitation of the government of France is of so much interest to the people of this country, and so suitable to the cordial re lations between the governments of the two countries, that the subject might properly be presented for attention at your present session. The government of Sweden and Norway has addressed an official invitation to this government to take part in the International Prison

Congress to be held at Stockholm next year. be problem which the Congress proposes to study, How to diminish crime," is one in which all the civilized nations have an interest in common, and the Congress of Stockholm seems likely to prove the most important convention ever held for the study of this grave question. Under the authority of a joint reso tion of Congress, approved Schruary 16th, 1875, a commission was appointed by my predecessor to represent the United States upon that occasion, and the Prison Congress having ed to 1878, his commission of 1875 to meet the expenses of the commissioners. I recommend the re-appropriation of that sum for the same purpose." reasury, is no longer available for the purpose without further action by Congress. The subject is brought to your attention at this time in view of the circumstances which render it highly desirable that the commissioner should proceed to the discharge of his important dulies immediately. As the several acts of Congress providing for detailed reports from the different departments of the government require their submission at the beginning of the regular annual session, I defer until that time any
